- a.
- b.
- c.
- d.

Connecticut

- a.
- b.
- c.
- d.

Rhode Island

- a.
- b.
- c.
- d.

1. How did the New England and Middle colonies economies differ from those of the Chesapeake and the Old South? What may have accounted for these differences?
2. What major geographical feature determined the western boundary for the English colonies?
3. Who populated each colonial region and how would this impact its development?
4. What was the order of colonial regional development? What factors contributed to this development?
5. Which colonial region would be the most populated? What would account for this development?
